CLUBHOUSE REFURBISHMENT

The Board of Directors is pleased to announce that work on the above project will take place during the first 2 weeks of January 2019. This is a relatively quiet time of the year, so we hope that the inconvenience to members can be minimised. The bar and catering services will be closed during this time.

At the AGM on 16 February, it was reported that project plans were in the process of being finalised and, after many months of careful consideration, the tender process to identify the best contractor for each project element was concluded in September. It has been developed with expert advice from Devon Interiors, an experienced local design company, and will include:

- redecoration of the entrance lobby, lounge and dining room
- new carpet/flooring throughout
- new furniture
- new bar
- extended catering servery unit
- improved heating/lighting
- new honours boards

A visual plan of the project is available in the clubhouse lobby.

It has been 15 years since the last significant spend in this area and the Board is confident that this project represents an exciting opportunity for the next stage of the Club’s development and is consistent with its ambition to be one of the best golf clubs in Devon and the South West of England.
